

Sprott Silver Miners & Physical Silver ETF (Nasdaq: SLVR) is the only[^] ETF focused on providing pure-play^{^^} exposure to silver miners and physical silver, a critical material with value both as a precious metal and in evolving industrial and technological uses. **SLVR** seeks to provide investment results that (before fees and expenses) correspond generally to the total return performance of the Nasdaq Sprott Silver Miners™ Index (NSLVR™) by investing at least 80% of its total assets in securities of NSLVR™. The Index is designed to track the performance of a selection of securities in the silver industry, including silver producers, developers and explorers, and physical silver.

[^] Based on Morningstar's universe of Precious Metals Sector Equity ETFs as of 1/14/2025.

^{^^} The term "pure-play" relates directly to the Fund's exposure to the total universe of investable, publicly listed securities in the investment strategy.

Key Points

- Pure-Play Silver ETF** – The only silver ETF focused on silver miners and physical silver.
- One of the World's Oldest Currencies** – Silver has value as a precious metal investment with historically low correlation to other asset classes.* Investments span coins, bars, jewelry and silverware.
- Critical to Energy and Technology** – Silver is a critical material that is used across a variety of advancing industries, including solar energy, AI, automotive technology and healthcare. Silver demand significantly exceeded supply in each of the last five years and is forecast to rise.**
- Well-Positioned Companies** – Companies upstream in the supply chain may be well-positioned to benefit from the increased investment in silver necessary to meet rising industrial demand and growing investment interest in precious metals.

IMPORTANT DISCLOSURES & DEFINITIONS

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Silver Miners & Physical Silver ETF Statutory Prospectus, which contains this and other information, visit <https://sprottets.com/slvr/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.

The Sprott Silver Miners & Physical Silver ETF is new and has limited operating history. Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. The Fund will be concentrated in the silver mining industry. As a result, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the silver mining industry, highly dependent on the price of silver bullion. The silver and precious metals industry can be significantly affected by competitive pressures, central bank operations, events relating to international political developments, the success of exploration projects, commodity prices, adverse environmental developments and tax and government regulations. An investment in the Fund involves a substantial degree of risk. The Fund is not suitable for all investors. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

Shares are not individually redeemable. Investors buy and sell shares of the Sprott Silver Miners & Physical Silver ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.

Funds that emphasize investments in small/mid-cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of investment losses. ETFs are considered to have continuous liquidity because they allow an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses, affect the Fund's performance.

The Sprott Silver Miners & Physical Silver ETF seeks to provide investment results that, before fees and expenses, generally correspond to the total return performance of the Nasdaq Sprott Silver Miners™ Index (NSLVR™).
